

# Bespoke Metrics Launches COMPASS Embedded App for Procore

PRESS RELEASE

## Leading Prequalification Platform Offers Risk Mitigation Tool to Construction Clients as Part of Procore's App Marketplace

**TORONTO — April 20, 2021 —** [Bespoke Metrics](#), a data management and analytical model development company, today announced the launch of its COMPASS Embedded App for [Procore](#), a leading provider of construction management software. COMPASS is a leading prequalification platform that focuses on data and analytics to assess subcontractor risk. The COMPASS Embedded App for Procore is currently available on the [Procore App Marketplace](#).

The COMPASS product suite, developed by Bespoke Metrics, provides advanced analytics to supplement and support a general contractor's internal risk management. One key feature of COMPASS is the Q Score – a numerical assessment of subcontractor risk based on business characteristics, financial information, and health & safety records – which acts as an unbiased independent benchmark for decision making.

As the first step in the partnership, the COMPASS Embedded App for Procore allows mutual users of the products to seamlessly access advanced subcontractor analytics via the Procore platform. Future phases will have the COMPASS Q Score and single and aggregate limits directly integrated in Procore – allowing general contractors to build these key risk metrics into their workflow.

“A data-driven preconstruction process is key to managing project risk and sets a project up for long-term success” said Doug Gibson, Business Development Manager at Procore. “Using Procore and COMPASS together increases transparency providing a more complete picture of risk prior to accepting bids and awarding contracts.”

“Bespoke Metrics is focused at continuously building the most beautiful, best-in-class Prequalification tool for General Contracts as well as Subcontractors. We will partner with crucial construction technology leaders to provide integration flexibility, providing the market with robust and agile prequalification technology. We are excited to work with Procore and continue to develop integrated solutions.” said Michael Ho, CEO at Bespoke Metrics.

## **ABOUT BESPOKE METRICS**

Founded in 2016, Bespoke Metrics is a data management and analytical model development company. Focused on producing tools to provide empirical support for decision making, Bespoke Metrics blends expertise in data control, model development, and user interface to provide innovative solutions for industries looking to utilize data to its fullest.
