Bespoke Metrics deepens Florida presence with Moss joining COMPASS

FORT LAUDERDALE, FL August 4, 2026

Moss & Associates

MOSS

Bespoke Metrics Inc. (Bespoke Metrics) is pleased to announce that Moss, a leading national construction firm, has selected COMPASS as its subcontractor prequalification platform. This partnership further strengthens COMPASS's presence in Florida, where more than 60 general contractors use the platform to standardize and streamline subcontractor prequalification.

As Moss continues to expand across Florida and grow its presence in Texas, COMPASS provides a consistent approach to subcontractor prequalification and risk management across multiple regions. Moss's adoption further expands the growing network of general contractors and subcontractors using COMPASS to create a more connected construction industry.

"

Florida is one of North America's most active construction markets, and COMPASS has built a strong presence across the state. Every new contractor that joins the COMPASS network increases its value for subcontractors, who can leverage their existing Q Score to gain visibility with more leading general contractors and pursue new business opportunities.

Mark Newman

Bespoke Metrics

KEY HIGHLIGHTS

- Moss joins more than **60** general contractors using COMPASS in Florida.
- COMPASS is used by over **350** general contractors across North America.
- Subcontractors can leverage their COMPASS profile and Q Score (Construction Credit Score) to demonstrate credibility and gain visibility with leading general contractors.

ABOUT MOSS CONSTRUCTION

Moss is a national, privately-held construction firm with regional offices across the United States focused on construction management, solar EPC, and design-build. The company's portfolio includes high-rise residential, wood-frame multi-family, landmark mixed-use developments, hospitality, K-12 and higher education, solar energy and battery storage, and sports. Moss is ranked by ENR as the nation's top solar contractor and one of the top 50 general contractors.
